KURT

HARRON

UX Designer

About Me.

Hi, I'm Kurt. I'm a UX and visual designer based in Brisbane who loves the space where technology meets creativity. I've always been fascinated by the friction between humans and the systems they use. I want to understand how the engine works under the hood, but more importantly, I want to figure out how to make it comfortable to drive.

That curiosity is the foundation of my work. It's what drove me to pair a Bachelor of Information Technology with a major in UX Design, giving me the technical vocabulary to build things, and the empathy to design them well.

What this means in practice is that I understand how complex systems are built, but I care much more about the people trying to use them. Whether I'm crafting brand identities for freelance clients, writing code in my free time, or troubleshooting network issues for frustrated teachers, my goal is always the same: to make the complex feel simple, beautiful, and accessible. I'm looking to bring my blend of technical curiosity, visual design, and empathy to a creative and passionate team.

Education.

University of Queensland

Bachelor of Information Technology - Major in User Experience Design (2018–2022)

Queensland Government

Orange Card (IT Service Management)

Three.js Journey

Bruno Simon Three.js Developer Course

My Skills.

Design & Research: User Persona Mapping, Wireframing, Low to High Fidelity Prototyping, Brand Design, Layout Design.

Software: Figma, Adobe Creative Suite (Photoshop, Illustrator, InDesign, Premiere Pro, After Effects), Blender, Ableton, VS code, Affinity.

Technical & Code: HTML/CSS, JavaScript, Three.js (3JS), Python, GLSL/Shader Coding, Arch Linux/Custom Window Managers.

When I'm not at work: You'll usually find me playing games, boxing, drawing, or toying around with my guitar.

Professional Experience.

IT Support Technician

State High + Junction Park | 2025 – Present

I provide daily technical support and system troubleshooting for hundreds of students and faculty members.

While it is a technical role, it is essentially daily user research. I watch how people interact with software, identify where they get frustrated, and find ways to make their digital environment more accessible. I also currently hold an active Queensland Orange Card for IT service compliance.

Brand & Design Assistant

Mark Emery (Freelance) | Jan 2025 – Dec 2025

I collaborated on print and digital brand identities for clients across Australia.

My day-to-day involved using InDesign, Illustrator, and Photoshop to translate client needs into high-fidelity visual assets. This role has sharpened my eye for layout, typography, and visual consistency across different mediums.

Swimming Coach

Moreton Bay Girls College | Sept 2019 – Present

I coached students aged 4 to 14, focusing on technique, motivation, and competition strategy.

Coaching has fundamentally shaped how I approach UX design. It taught me how to break down complex tasks into simple steps, provide constructive feedback, and adapt my communication style to different types of learners.

Featured Projects.

Just the Facts | Data Visualisation

https://drive.google.com/drive/folders/11NGHADhwgXjGNLs088kX9qzrr8Nh8N3J

The Goal: To take complex, dry data sets and transform them into a visual format that users could actually comprehend and enjoy interacting with.

The Approach: I focused heavily on information architecture and clean UI design, ensuring that the visual hierarchy guided the user's eye naturally without overwhelming them.

Beat Boxer | Tangible Interaction Design

https://ixd-exhibit.uqcloud.net/archive/2021/synesthesia/

The Goal: To explore the intersection of physical exertion and digital creativity by transforming a physical punching bag into an interactive, real-time music modulation tool.

The Approach: My team and I built a physical installation that translated full body movement into dynamic audio feedback. As someone who boxes, it pushed me to think about UX beyond the screen, mapping physical interactions to digital responses.
